

IDAHO TRANSPORTATION DEPARTMENT
Contract to Provide Fire Protection for Vehicle Fires and fire suppression support
within ITD Right of Way

The Idaho Transportation Department's mission is "to provide cost-effective transportation systems that are safe, reliable and responsive to the economical and efficient movement of people and products."

Term of Contract

The term of this contract will be for 5 years, additional 5 year contracts and/or yearly modifications to this contact may be made when agreed upon by the contracted Agency Department, State Fire Marshal and the Idaho Transportation Department.

SUMMARY OF THIS WORK

The work of this contract is intended to provide the Idaho Transportation Department with fire protection for vehicular fires and fire suppression support for EMS extrication within the ITD Right of Way outside of any organized Fire Department jurisdiction.

Extinguishment of vehicle fires and/or fire support shall be in accordance with the responding Fire Departments Standard Operating Procedures (SOP) and guidelines of this document.

The responding fire agencies shall provide written documentation for the following:

- Firefighters have been trained in proper extinguishment of vehicle fires through NFPA Firefighter I or equivalent, and/or other Department certification signed by the Fire Chief as being able to perform to the Firefighter I level.
- Fire apparatus is certified by the Fire Department that it meets NFPA minimum standards.
- Fire Department personnel have and shall use personnel protective equipment in accordance with NFPA 1971 including SCBA, this shall also include wearing of a Class III reflective vest, or if a vest is not available insure that the reflective tape of the structural firefighting gear is in good condition. NFPA 1001 5.3.3

The Fire Department shall establish a safe work zone while working within the highway right-of-way. All traffic control shall comply with 6-I Control of Traffic through Traffic Incident Management Areas of the Manual for Uniform Traffic Control Devices (MUTCD). See attachment of MUTCD 6I

EQUIPMENT

Classification Types

The Classifications for fire apparatus shall be in accordance with the current version of the Idaho Department of Lands Fire Service Organization Rate Book.

Minimum Standards

The Minimum Standards for fire apparatus shall be in accordance with the current version of the Idaho Department of Lands Fire Service Organization Rate Book.

All of the Minimum Standards must be met to receive payment for equipment.

The fire departments will be required to submit estimates based on the most current Idaho Department of Lands Fire Service Organization Rate Book for response.

The fire department shall submit a completed Idaho Fire Incident Report (IFIRS) along with a narrative of the incident containing the call out time, on-scene time, and scene clearance time, location of the incident (Route, milepost and direction of travel. The type and number of apparatus responded, and the number of personnel that responded.

Billing, Idaho Fire Incident Report (IFIRS), and narrative information shall be submitted to the State Fire Marshal's office for review before being forwarded to ITD for payment.

Responsibility for ITD Notification

During any vehicle fire suppression activity upon ITD roadway where water is used during or forecasted freezing conditions the fire department will notify ITD of a potential roadway icing condition.

PAYMENT FOR RESPONSE

Payment for response shall be based on the most current Department of Lands Fire Service Organization Rate Book.

Payment for foam and absorbent materials shall be paid from the original vendor invoice, when submitted along with the billing.

ANY CANCELLATION OF APPARATUS WILL NOT BE ELIGIBLE FOR PAYMENT.

EXAMPLE ONLY

**Idaho department of Lands (IDL) – 2006 Fire Service Organizational Rates
STRUCTURAL ENGINES**

CLASS	UNOP DAILY RATE	UNOP HOURLY RATE	FULLY OP DAILY RATE	FULLY OP HOURLY RATE	# PERSONS
E1	\$ 1,394	\$ 100	\$ 2,394	\$ 171	4
E2	\$ 1,291	\$ 92	\$ 2,041	\$ 146	3

ADDITIONAL PERSONAL PAYMENT

Additional personnel above the recommended number required by the IDL Rate Book shall be paid in accordance with the Fire Departments regular certified pay scale. The current AD rate will apply to Fire Departments without a certified pay rate.

EQUIPMENT

Heavy Rescue apparatus will be paid the same rate as an E-1 engine

Other rates shall be paid in accordance to the current Interagency Business Management Handbook Supplement to Chapter 20.

MATERIALS:

FOAM

ITD shall make reimbursement for foam when provided by the Fire Department

- Compressed Air Foam System (CAFS) – Plumbed into the system, increase the rate by 10% of the specified un-operated rate.
- Metering Systems (Automatic Regulating Proportioning System) – Systematic metering units, increase the rate by 5% of the specified un-operated rate.
- Any other foam capabilities, such as eductor units which siphon foam into the hose system, or when the foam is dumped directly into the tank, will not receive any additional compensation.

ABSORBENT MATERIALS

ITD shall make reimbursement for absorbent materials when provided by the Fire Department. Absorbent materials such as floor dry, booms and/or pads used to contain and/or divert motor vehicle fluids.

ITD, IN NO WAY ASSUMES LIABILITY FOR ANY FIREFIGHTING OPERATIONS.
